We provide our customers with the following

- Professional management of our suppliers.
All suppliers are subject to a rigorous approval process.

- Forwarders and processing partners are regularly assessed to guarantee flawless performance in the delivery process.

- Intensive inspection of incoming goods with additional chemical analyses to ensure that the products meet the highest customer requirements and product specifications.

- A process result assessed in acc. with the latest standard, i.e. rff not only manages the processes but also analyses the outcome, to continuously optimise the order processing with our customers.

- Qualified employees who are regularly trained in upcoming technical developments so as to always remain a competent expert partner for the customer.

- Certified environmental management in acc. with DIN EN ISO 14001, which emphasises the requirement for rff to constantly improve without forgetting its duty to the environment.

- A management system in acc. with DIN ISO 45001 for safety and health at work.
